DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8 recites a composition comprising a food and a health-promoting agent consisting essentially of polygalacturonides. It is not clear if the health-promoting agent is the polygalacturonides or if the polygalacturonides is one of the ingredients in the health-promoting agent. For the purpose of prosecution the recitation is interpreted to mean either.

Claims that depend from rejected base claims that are unclear are also rendered unclear and are rejected for the same reasons.

Joint Inventors

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later

invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 8-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bogentoft (US 4191744).

Claims 8-12 are drawn to a composition comprising a food and a health-promoting agent consisting essentially of polygalacturonides; wherein the food is a beverage, a baby food, a canned food and a composition wherein the polygalacturonides improve taste of the food.

Bogentoft discloses the use of polygalacturonic acid to improve palatability (see col. 3, lines 41-52; col. 4 examples 3 and 4). The preparations may also contain additional agents (see col. 7, lines 3-5).

Art Unit: 1623

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use polygalacturonides in a composition which is a baby food or a beverage or a canned food and to improve the taste of food since the taste improving polygalacturonic acid and an effective percentage range is disclosed in the prior art.

One of ordinary skill in the art would be motivated to do so since such compositions according to Bogentoft produce clear solutions and do not give pharmacological systemic effects, is well tolerated, and has good taste and consistency (col. 1, lines 10-16 and col. 2, lines 24-40).

Conclusion

Claims 8-12 are rejected
